PROFESSIONAL SUMMARY

Career Objective
To serve diligently in any capacity entrusted to me, contributing to the achievement of institutional and corporate goals while continuously developing my professional skills, confidence, and capacity.

KEY PERSONAL ATTRIBUTES

* Excellent command of spoken and written English.

* Strong interpersonal and communication skills.

* Ability to work under pressure with minimal supervision.

* Disciplined, composed, and professional personality.

* Ability to work independently and implement creative improvements.

EDUCATION

Ho Technical University, Ho, Ghana - HND Computer Science - 2024-

Ada Senior High School - W.A.S.S.C.E. - 2018-2021

Englesi-Kenya D/A Basic School - B.E.C.E. - 2009-2017

WORK EXPERIENCE

Factory Hand

Tema Free Zone

Jay Kay Company Limited, Jan 2022 – Dec. 2023

- Operating machinery: Assisting with basic machine operations and feeding raw materials into production lines.
- Product assembly: Piecing together parts, components, or finishing items based on exact production guidelines.
- Material handling: Loading and unloading raw materials, inventory, or finished goods from delivery trucks and moving them across the factory floor.
- Product sorting: Categorizing items on a conveyor belt and separating defective products from approved units.
- Packing and sealing: Placing finished products into boxes, containers, or bags, then labeling and sealing them securely for shipment.
- Defect inspection: Visually examining products to catch small flaws, irregularities, or damages before they are dispatched.
- Measurement verification: Taking accurate physical measurements or weights to ensure consistency across the batch.
- Workplace cleanliness: Sweeping the factory floor, cleaning up spills, and removing debris from walkways to maintain safe conditions.
- Machine cleaning: Wiping down, sanitizing, and performing basic, routine maintenance on production equipment.
- Safety compliance: Strictly wearing compulsory personal protective equipment (PPE)—such as steel-toe boots, hard hats, safety vests, and masks—and reporting hazards immediately

Software Engineer & Departmental Organizer

Computer Science Students Association (COMPSSA), Department of Computer Science, Ho Technical University.

2024 – Present

- Departmental organizing: Serving as organizer for the Department of Computer Science, coordinating departmental activities and supporting smooth communication between staff and students.
- Software development: Contributing to coding projects and departmental initiatives as a software engineer, applying programming skills to practical problem-solving.

- Global Coding Project: Selected member of a global coding initiative brought to the department, collaborating with peers on software development tasks as part of an international programme.

Lower Volta Sector Media Head,

Pentecost Students and Association, Ho Technical University (PENSA HTU),2026.

- Publicity, Communication and Branding: Designing flyers, posters, banners for all sector programs (conferences, evangelism, etc.). Manage all social media pages and announce programs on time.
- Photography & Coverage: ensuring every program is well covered (photos, videos, live streaming)
- Technical and Sound: Sound, projector and livestream setup. Ensuring quality of audio and video is up to expectation.
- Documentation: Keeping records of all programs, writing reports or working with secretary to document events.

TECHNICAL SKILLS

Programming: Writing and debugging programs using object-oriented and structured programming concepts.

Web development: Building web pages and basic web applications using HTML, CSS, and JavaScript.

Database management: Designing relational databases and writing SQL queries to store, retrieve, and manage data.

Data structures & algorithms: Applying data structures and algorithmic thinking to solve practical computing problems.

Software engineering: Understanding the software development life cycle, system analysis and design, and collaborative coding practices.

Computer networking: Knowledge of networking fundamentals, including network setup, protocols, and basic network troubleshooting.

Operating systems & computer maintenance: Working with Windows and Linux environments, and performing basic computer hardware and software troubleshooting.

Productivity software: Proficient in Microsoft Office applications (Word, Excel, PowerPoint) for documentation, data handling, and presentations.

Equipment setup: Calibrating, preparing, and starting specialized manufacturing machinery under supervision.

Basic troubleshooting: Identifying mechanical blockages, minor errors, or routine faults to prevent extended production downtime.

Hand-tool proficiency: Confidently using pneumatic tools, grinders, drills, and basic hand tools for equipment adjustments.

Graphic design skills: Proficiency in Photoshop and Canva. Flyer, poster, banner and logo design and branding.

Photography and Videography: camera handling, event coverage, video shooting and editing.

Leadership and project management: leading a team and working with other sectors, time and project management and meeting deadlines when due.

ADDITIONAL SKILLS

Strong communication and presentation skills, Fluent in English.
Leadership through initiative and teamwork. Problem-solving and analytical thinking, public speaking and peer teaching
